

## Why invest in our products.....

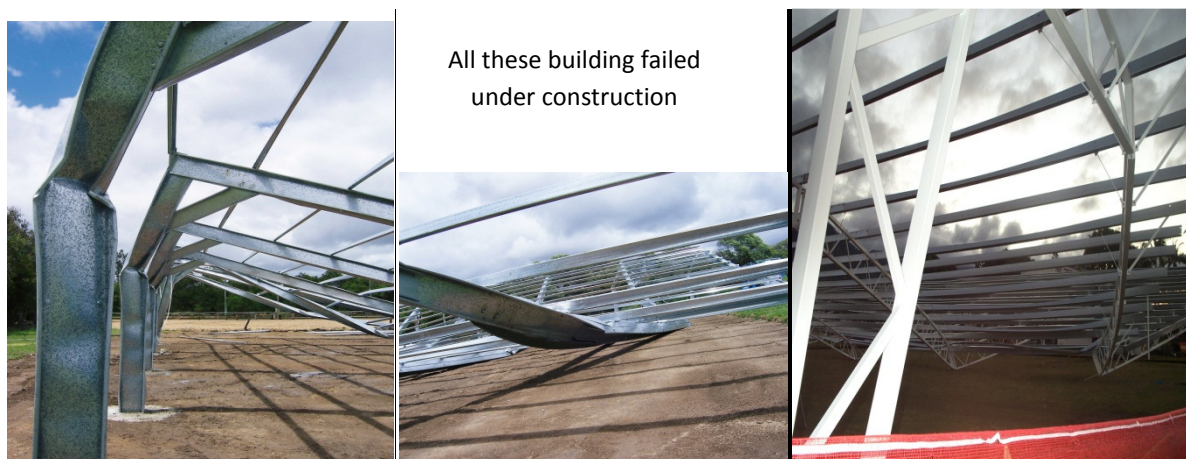

Our manufacturer has had over 30 years of Steel building experience in the industry building many projects across the eastern seaboard of Australia. This experience and the proven track record of our manufacturer have given the confidence that Affordable Sheds can offer products in both domestic and commercial applications. They have serviced an enormous customer base over the years which include just mentioning a few;

Q Build	(School walk ways and covered areas around the state)
Queensland Main Roads	(Gateway Shelter Constructions)
Queensland Health	(Nambour District Hospital)
Queensland Rail	(Repair shop extensions)
Thomas & Coffey	(Queensland University St Lucia)
Abby Group	(Recent School Shelters at Dingo, Jundah, Jericho, Bauhinia & Builyan)
Australian Defence Force	(Enoggera Army Base Stages 1, 2 & 3)
Catholic Education Department	(Far North Queensland School Shelter Projects)

## Why Invest in Quality then Price.....

Our manufacturer uses only high quality materials that are fully engineered into the constructions that they build. They use only local products that have been designed around the harsh conditions for Australia. The difference is enormous so when evaluating the cost of your building requirements, place a cost also on the lives that you maybe jeopardising by using an inferior cheaper product. Remember steel is sold by the Tonne and that it takes years of dedicated research and development to get it right.

This is what you could be purchasing if you sacrifice quality and price.....

**So we can always offer you the peace of mind that what you will be using for your future investment will be built to the correct Australian standards.**

Regards
