Care for your new carpet & vinyl flooring

It is important that if you want your new floor to perform to its full potential - a little care is required.

=/=/=/=/=/=/=/=/=/=/=/=/=/

Special note: The domestic range of floor coverings, other than that in the ensuite, has NOT been glued. So care should be taken when vacuuming near wall edges in case of lifting of floor covering. This also assists in future removal should you decide to change your floor covering.

=/=/=/=/=/=/=/=/=/=/=/=/=/

Simple precautions may prevent any unnecessary wear and damage to your new floor covering.

- It's a good idea to **use an outdoor mat** to remove any grit or dirt from shoes before entering the cabin
- To avoid any damage when moving heavy objects such as refrigerators, lift **or slide them into position on a sheet of particle board** or plywood.
- Ensure furniture with **sharp or small feet are fitted with suitable end caps or glides** to distribute the weight evenly. Similarly a **protective material such as felt can be fitted** to prevent excessive marking from constantly moving furniture.
- **Chair pads are mandatory under chairs with roller castors.**
- Regular effective **vacuuming of your carpet** (3-4 times per week dependent upon traffic and soiling) by sweeping the vacuum head **back-n-forth up to 7 times** will ensure maximum dirt removal.
- **Some rubber products** such as mats or chair stoppers **can cause permanent staining on vinyl flooring.**
- The **Jasol range** of floor cleaning products is recommended to be used on your new vinyl floor
 - ◇ Jasol Clean Mop - an all-purpose no rinse floor cleaner.
 - ◇ Jasol Ultra Film - a satin finish metallised floor polish.
 - ◇ Jasol Stripper - for removing the build up of old polish or sealer.
